Python 100 Projects Journey ■

I am currently practicing Python with the goal of completing 100 projects to strengthen my program
Along the way, I will gradually integrate concepts from Mathematics, Machine Learning, and Deep I

■ Completed Projects (so far):

1. Band Name Generator
2. Tip Calculator
3. Treasure Island (Text Adventure Game)
4. Rock Paper Scissors
5. Password Generator

(This list will keep growing as I progress!)

■ Goals:

• Build 100 Python projects to improve problem-solving skills.
• Move from beginner-friendly projects → to advanced applications (ML/DL/Math-integrated).
• Document learning journey step by step here on GitHub.
